

Sires

Leader KT0410

This is a bull that you are really going to have to look out for. His breed character, softness, sheath, structure and temperament are exactly what the Kochbo stud is looking for. The calves that we have seen on the ground so far seem to be mirroring Leader's brilliance.

Obelix KT0713

Obelix is a sire that has contributed so much to our herd and probably the breed. He had a phenomenal constitution with good muscle and this is usually very evident in his progeny. Two thirds of my 2013 National show team was of his calves.

RH0523 Showboy

Showboy is a very pleasing bull to look at. His eye appeal comes from a balanced combination of ideal Santa characteristics, being a cherry red colour with a slick coat type, a masculine strong head with a kind eye, a totally correct frame covered with heaps of soft muscle. His sheath is ideal and his testicles are large. Showboy is stamping his progeny and his daughters are proving to be great breeders of good quality calves.

VV 474

VV was on the age of 6 when we bought him from Willie de Jager and where he done well in his herd. He is a bull with a huge body volume and breeds a lot of quality in his females. He was retained in the stud to maintain weight gain ability in the herd, and his progeny have inherited this desirable trait. Fertility is also another strong point and his also the father of the well-known Kochbo Shotgun.

Shotgun KT1015

Shotgun had a very successful show career and was the SA Junior Champ and Interbreed Champ in 2013. He showed terrific body development at a young age and outstanding weight gain ability. Shotgun has a friendly nature, well balanced with a good sheath, great definition of muscle and a lot of width in his hindquarter. After the show he was sold to Santarific Santas.

VV 08106

SA Grand Champion 2013 and Interbreed Gold cup winner. We greatly admire his thickness, correct structure and character. It is a wonderful sight to see him striding around effortlessly and purposely in his cow herd.

H&B Hef-A-nizer 86/9 USA semen imported.

While he is not the tallest bull in the world, he carries a ton of meat or muscle on an extremely long structurally sound body. The combination of these features with good breed character produces a very well balanced bull that is appealing to the eye.
